GENEALOGY MAIN TREE & BRANCHES INFORMATION

Not all of the Ries families have been tied into one tree. These additional families are designated with the letter z and are at the end of this doc.

ADDITIONS & CORRECTIONS:

The genealogical section is still quite incomplete and may have errors. It is hoped that descendants from the different branches will continue the research in an attempt to fix the errors and to tie all of the families together into one tree.

To help distribute the workload, it is requested that all information be entered electronically in the correct format and emailed to Clyde Eisenbeis. Contact Clyde for the correct format / current procedure (the procedures continue to evolve as technology changes).

GENEALOGY NUMBERING SYSTEM

There can be considerable confusion with so many families. To ease the confusion, a numbering system is used throughout the entire document. The leading digits indicate the parent's number, and the last digit indicates the placement in the family (i.e. a:3.2 is the second child of the a:3 parents).

-
a: Father
> a:1 First Child
> a:2 Second Child =>

-
a:2 Second Child
> a:2.1 First Child of a:2
-
a:3 Third Child
> a:3.1 First Child of a:3
> a:3.2 Second Child of a:3
-

Note that a '-' is used instead of a '.' after every fifth character to help

distinguish the differences between long strings of numbers ... for example,

 Inventing, fishing, telling humorous stories, singing
 German songs and playing cards (whist, gin rummy,
 cribbage) were his favorite pastimes.
 His inventions covered a broad range. He designed and
 built a pop-up toy for his son that was cleverly simple
 and entertaining; a combine hitch; a carburetor that
 used a kerosene lamp wick; an electrical box with the
 ground screw in front; fishing gear; a saw that rotated
 a small amount which was enough to cut sheetrock but
 not skin. He never had enough money to file patents.
 One of his most recognized inventions was a three-wheel
 bicycle with two wheels in front instead of back. This
 bicycle leans like a regular bicycle and is not rigid
 like a tricycle. Designed and built in the 1970s, a
 similar design is now available from other companies
 as a bicycle and as a motorcycle.
 He commented how he had lost his strength – while he
 was swinging a sledgehammer at the age of 79. He
 retired as an electrician when he was 80 – for a month.
 Then he renewed his license, because he was bored. He
 Continued working as an electrician until he was 85.
 His business card showed his sense of humor,
 “Eisenbeis Electric, Semi-Retired Electrician. If you
 can’t find your shorts, call Ray!”

Was adopted by a German family of Lutheran faith circa 1915.
A Henke aunt who took care of Ida after Leon Roman's death. This
aunt was immigrating to the USA could not take the young child
Ida. The child was too much of a burden so she had left the child
in Russia, with a German family of the Lutheran faith. The Germans
from Poland had been taken on a forced migration to Russia during
the world war I. After the war was over, Ida's brother Ferdinand,
traveled to Saratov, Russia and tried to get her back, but she had
already been officially adopted. Also, she had lived with them
for many years and she did not know who Ferdinand even was.
So she was left and all contact was lost.
