GENEALOGY MAIN TREE & BRANCHES INFORMATION

Not all of the Henke families have been tied into one tree. These additional families are designated with the letter z and are at the end of this doc.

ADDITIONS & CORRECTIONS:

The genealogical section is still quite incomplete and may have errors. It is hoped that descendents from the different branches will continue the research in an attempt to fix the errors and to tie all of the families together into one tree.

To help distribute the workload, it is requested that all information be entered electronically in the correct format and emailed to Clyde Eisenbeis. Contact Clyde for the correct format / current procedure (the procedures continue to evolve as technology changes).

GENEALOGY NUMBERING SYSTEM

There can be considerable confusion with so many families. To ease the confusion, a numbering system is used throughout the entire document. The leading digits indicate the parent's number, and the last digit indicates the placement in the family (i.e. a:3.2 is the second child of the a:3 parents).

-
a: Father
> a:1 First Child
> a:2 Second Child =>
> a:3 Third Child =>
> a:4 Fourth Child
-
a:2 Second Child
> a:2.1 First Child of a:2
-
a:3 Third Child
> a:3.1 First Child of a:3
> a:3.2 Second Child of a:3
-

Note that a '-' is used instead of a '.' after every fifth character to help

distinguish the differences between long strings of numbers ... for example, a:1.5.5.1.14-1.1 CLYDE THOMAS EISENBEIS.

GENEALOGY SYMBOLS (ZEICHEN)

Inventing, fishing, telling humorous stories, singing German songs and playing cards (whist, gin rummy, cribbage) were his favorite pastimes.
His inventions covered a broad range. He designed and built a pop-up toy for his son that was cleverly simple and entertaining; a combine hitch; a carburetor that used a kerosene lamp wick; an electrical box with the ground screw in front; fishing gear; a saw that rotated a small amount which was enough to cut sheetrock but not skin. He never head enough money to file patents.
One of his most recognized inventions was a three-wheel bicycle with two wheels in front instead of back. This bicycle leans like a regular bicycle and is not rigid like a tricycle. Designed and built in the 1970s, a similar design is now available from other companies as a bicycle and as a motorcycle.
He commented how he had lost his strength – while he was swinging a sledgehammer at the age of 79. He retired as an electrician when he was 80 – for a month. Then he renewed his license, because he was bored. He Continued working as an electrician until he was 85.
His business card showed his sense of humor, “Eisenbeis Electric, Semi-Retired Electrician. If you can’t find your shorts, call Ray!”

        * circa 1908
        Was adopted by a German family of Lutheran faith circa 1915.
        A Henke aunt who took care of Ida after Leon Romans death. This
         aunt was immigrating to the USA could not take the young child
         Ida. The child was too much of a burden so she had left the child
         in Russia, with a German Family of the Lutheran faith. The Germans
         from Poland had been taken on a forced migration to Russia during
         the World War I. After the war was over, Ida's brother Ferdinand,
         traveled to Saratv, Russia and tried to get her back, but she had
         already been officially adopted. Also, she had lived with them
         for many years and she did not know who Ferdinand even was.
         So she was left and all contact was lost.
